SKILLS

Excel | Financial Modeling & Analysis | Python | LLMs & AI APIs | Claude Code | Tableau | R-Studio | SAP HANA

EDUCATION

University of Delaware, Lerner College of Business & Economics

Newark, DE

- Major: B.S. Finance, Minor: Fintech, GPA: 3.3
- Dean's List: Fall 2022, Fall 2023, Spring 2025, Fall 2025

May 2026

WORK EXPERIENCE

Outlier – AI writing evaluation platform aimed at improving clarity, structure, and quality

Remote

AI Writing Evaluator

June 2024–Present

- Improve the **accuracy** and **reliability** of analytical outputs by evaluating written submissions against structured criteria, **identifying logical gaps, inconsistencies, and quality issues** that could impact downstream decision-making.
- **Strengthen** overall **output quality** by delivering clear, standards-based written feedback, reinforcing accuracy, defensible reasoning, and adherence to guidelines.
- Maintain consistent quality across **20+ evaluation projects, balancing speed and precision** similar to recurring reporting and review cycles.

Romero Capital – Early-stage PE search fund focused on healthcare, technology, and education

Remote

Equity Research Intern

May 2025–Aug 2025

- Supported the managing partner's investment decision-making by conducting structured industry and company due diligence, synthesizing insights from **earnings calls, SEC filings, and investor presentations** to evaluate **business quality, risks, and long-term value drivers for six companies (NBIS, HIMS, SMCI, AAP, NFLX, AMZN)**.
- Built a strong analytical foundation through an intensive **six-week investment banking training program**, developing disciplined **valuation and modeling skills** to support assumption-driven analysis and investment judgment.

Selected Project Experience: Investment Analysis and Valuation of NBIS (Nebius Group)

- Built a **10-year dynamic three-statement financial model** incorporating detailed revenue growth assumptions, margin expansion schedules, CapEx projections, and working capital analysis to assess NBIS's long-term financial trajectory amid rapid AI infrastructure expansion.
- Conducted **DCF and comparable company analysis** using EBITDA, Sales, and P/E multiples against peers including AWS, Microsoft Azure, and CoreWeave to triangulate intrinsic value across bull, base, and bear cases.
- Issued a **buy rating with a \$60.00 price target (~15.5% upside at time of publication)**, supported by a **WACC of 10.0%** and terminal growth assumptions of 2.8%–3.5%; it **closed above target 17 days later** (8–16 month window).

PROJECTS

Personal AI Project

Remote

Developer & Researcher

Oct 2025–Present

- Designed and shipped **three live finance tools** using **Claude Code**: a 10-year DCF calculator with live market data, an M&A accretion/dilution model, and an FP&A plan-vs-actual variance dashboard.
- Defined the **finance logic** and **checked every output**, e.g. variance rules that flip for revenue vs. cost lines and accretion math that holds for any stock/cash/debt mix.
- Built a **personal portfolio site** that brings together these tools, my NBIS equity research and full 28-slide deck, my career timeline, and my complete coursework.

LEADERSHIP EXPERIENCE

Fraternity, Sigma Alpha Epsilon

Newark, DE

Head Apparel Chair

Sept 2024–May 2025

- Mapped **vendor price breaks against demand in Excel** (members plus event sales to non-members) to choose order sizes that **lowered per-unit cost**.
- Co-ran apparel for **joint philanthropy events** with other chapters, supporting CMN Hospitals, Movember and NMDP.

Fraternity, Sigma Alpha Epsilon

Newark, DE

Head Housing Chair

Sept 2023–May 2024

- Built **12-month all-in cost estimates in Excel** (rent plus utilities) for **7+ off-campus houses** so **40+ members** could choose one that fit their budget.
- Worked with landlords to **confirm what each lease included** (e.g., utilities) so every estimate captured the full cost.
